Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities:

Claim 1, lines 9 and 15, "*" should be removed.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis, Jr. et al. (6,139,082).

Davis Jr., et al. disclose a dashboard assembly having a structural element (16). The structural element (16) has flanges that extend perpendicular to its direction of elongation. These flanges define channels (36,46) used for the releasable attachment of components (28,32). While not disclosed, a load acting perpendicular to the structural element's direction of elongation will cause displacement of the components.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3612

5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Davis, Jr. et al. (6,139,082).

Davis, Jr. et al. does not disclose the claimed range of force that displaces the housing.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the housings of Davis, Jr. et al. such that they are displaced by a load of 10-100 newtons as an obvious design limitation, determined by testing, to meet passenger safety regulations.

6. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Davis, Jr. et al. (6,139,082).

Davis, Jr. et al. does not disclose the claimed distance between the bulkhead and the flanges.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to place the flanges at least 30 mm from the bulkhead to provide adequate space for wiring, ventilation systems, and various other components and for the worker that must connect these components to the instrument panel.

Allowable Subject Matter

7. Claims 2-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
